

Mr. Walter

Bulo

Product Specification Sheet

Mr. Walter is a tribute to the original file pedestal that Bulo began with in 1963. Made of wood, Mr. Walter is a contemporary storage collection that is both functional in an office environment as well as aesthetical and warm at home. Various accessories are available for organisation and cushion tops can be added to create an extra seat. Mr. Walter comes in a selection of versatile colors with melamine or veneer finished tops.

Bulo Designers

The Bulo Team consists of architects, interior designers, product developers and craftsmen. With passion for furniture and eye for detail we strive to create products that make people find pleasure in their daily activities. Since the founding of the company, we've always had a great eye for tendencies in the office and furniture industry. We're not afraid to explore the unexplored, which led to the creation of multiple innovative collections, such as the organic 'Kei' tables in 2008, the 'grID' collection inspired by De Stijl in 2012 and the modular 'Dan' series in 2014.

Specifications

The carcass is made out of powdercoated mdf panels in mitre joint. The top panel is recessed offering a multifunctional use for office supplies, a cup of coffee, magazines or a cushion, allowing the pedestal to function as an additional seating element. The top panel can be finished in various melamine or veneer finishes to match with the colour and/or material of the table. The upper drawer of the pedestals always has a red inside drawer. The box file drawer can be used for hanging files, but also for binders or for personal items such as a handbag. The pedestal can be equipped with a central locking mechanism. The lock always has a red rose on the front.

Environment

Compared to a metal pedestal, the Mr. Walter pedestal - carcass and fronts in wood - has a remarkably smaller ecological footprint. The production of powdercoated mdf ($\pm 60\%$ of the total material) absorbs more CO2 than is emitted. The production of a Mr. Walter pedestal produces at least 50% less CO2 emission than the production of a metal pedestal.

Types

Pedestal: Small w.324 x d.600 x h.532/583 mm

Pedestal: Medium w.424 x d.600 x h.532/583 mm

Credenza: Medium, w.794 x d.438 x h.532/583 mm

Credenza: Large, w.1194 x d.438 x h.532/583 mm
