## Vincent Van Duysen

Award-winning Belgian architect and designer, Vincent Van Duysen, started his career working in Milan with Cinzia Ruggeri and Aldo Cibic-Sottsass Associati in 1985. Van Duysen established his own studio in Antwerp in 1990, engaging in a wide range of projects in Belgium, Europe, the Middle East and the US - with no limits to the diversity: interiors, buildings, private houses, apartment complexes, office concepts, retail, etc. Van Duysen is also renowned for the design of smaller objects and furniture he developed for international design houses.

From the very start, the driving force in Van Duysen's work has been the close relationship he nourishes between architecture, interior and product design. In his projects, the subtle transitions between all of these disciplines are realised in combination with a spatial design that continuously aims for the essence. This is an architectural language that embraces aesthetics while resisting passing trends and fashion. Throughout his career, Vincent Van Duysen has received multiple accolades, the most recent of which are the Flemish Culture Prize for Design and the Belgian Designer of the Year Award.

## VVD DESK

The VVD Desk is Vincent Van Duysen's interpretation of the "cubicle" desk system. Minimalistic yet beautifully detailed, the VVD Desk has timeless aesthetics. It is Van Duysen's architecture scaled down to a compact piece of furniture. The side panels with solid surfacing borders in Corian are upholstered in fabric Divina by Kvadrat.
