

# Bulo

Salone del Mobile  
2023

## Hello, Bulo

Bulo develops and manufactures furniture that enhances the quality of working and living in both the office and at home, since 1963. Bulo offers a wide range of timeless and elegant collections created by renowned Belgian and international architects and designers such as Vincent Van Duysen, Gensler, Bataille-ibens and Léon Stynen. The furniture is durably manufactured and customised with skill and love for the profession in the in-house veneer studio.

# VVD BISTRO & VVD CHAIR

by Vincent Van Duysen

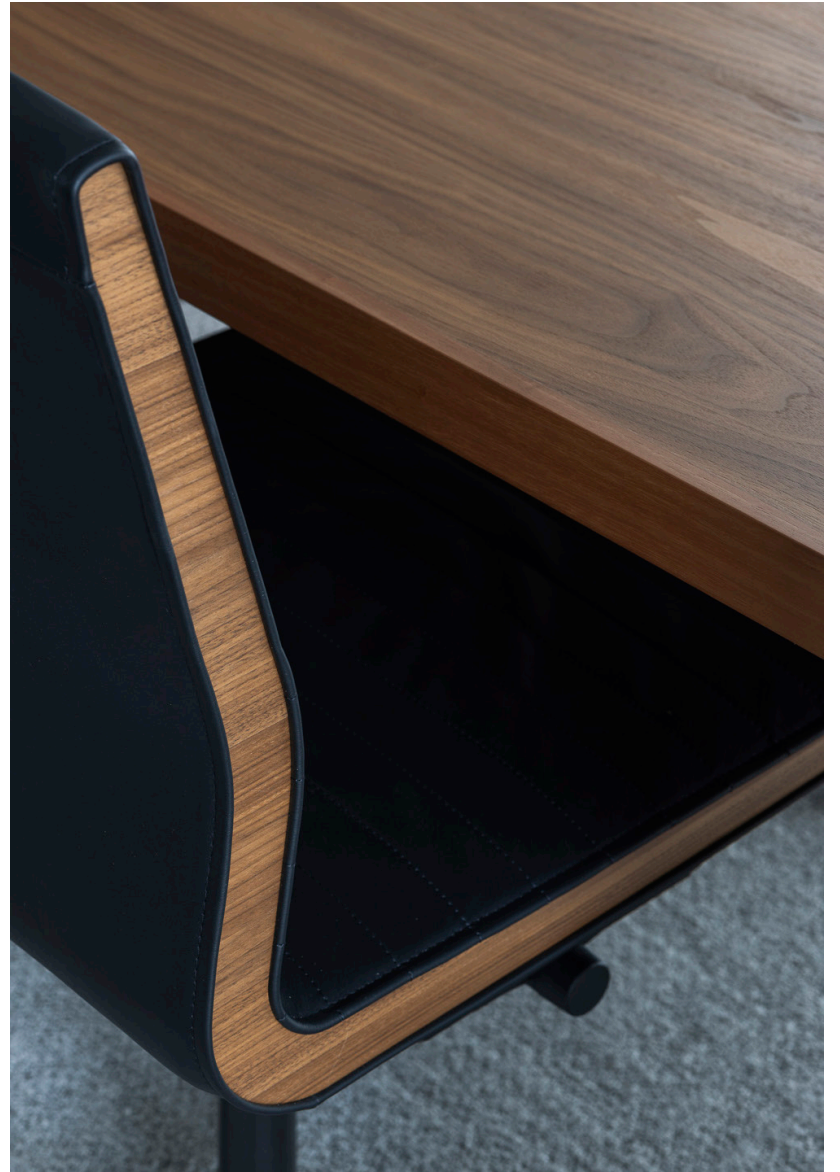

The VVD BISTRO Collection brings accessible, comfortable, modern and light designs. Created for homes, offices, and your favorite meeting spaces with colors that give it a domestic and welcoming character. The multi-functional collection has soft, ergonomic shapes that are made with durable finishes that can withstand the test of time.

VVD Chair is an elegant chair, characterized by pure lines, a specific profile, remarkable ergonomic qualities and the use of innovative materials. A broad choice in lacquers, veneers and upholstery makes the chair complement any desk and its user.

**B7**

by B Brand

B7 is a modular sofa with a footprint of 120 x 120 cm and a maximum range of uses: a full 360° approach.

**Dan**

by Bulo Design

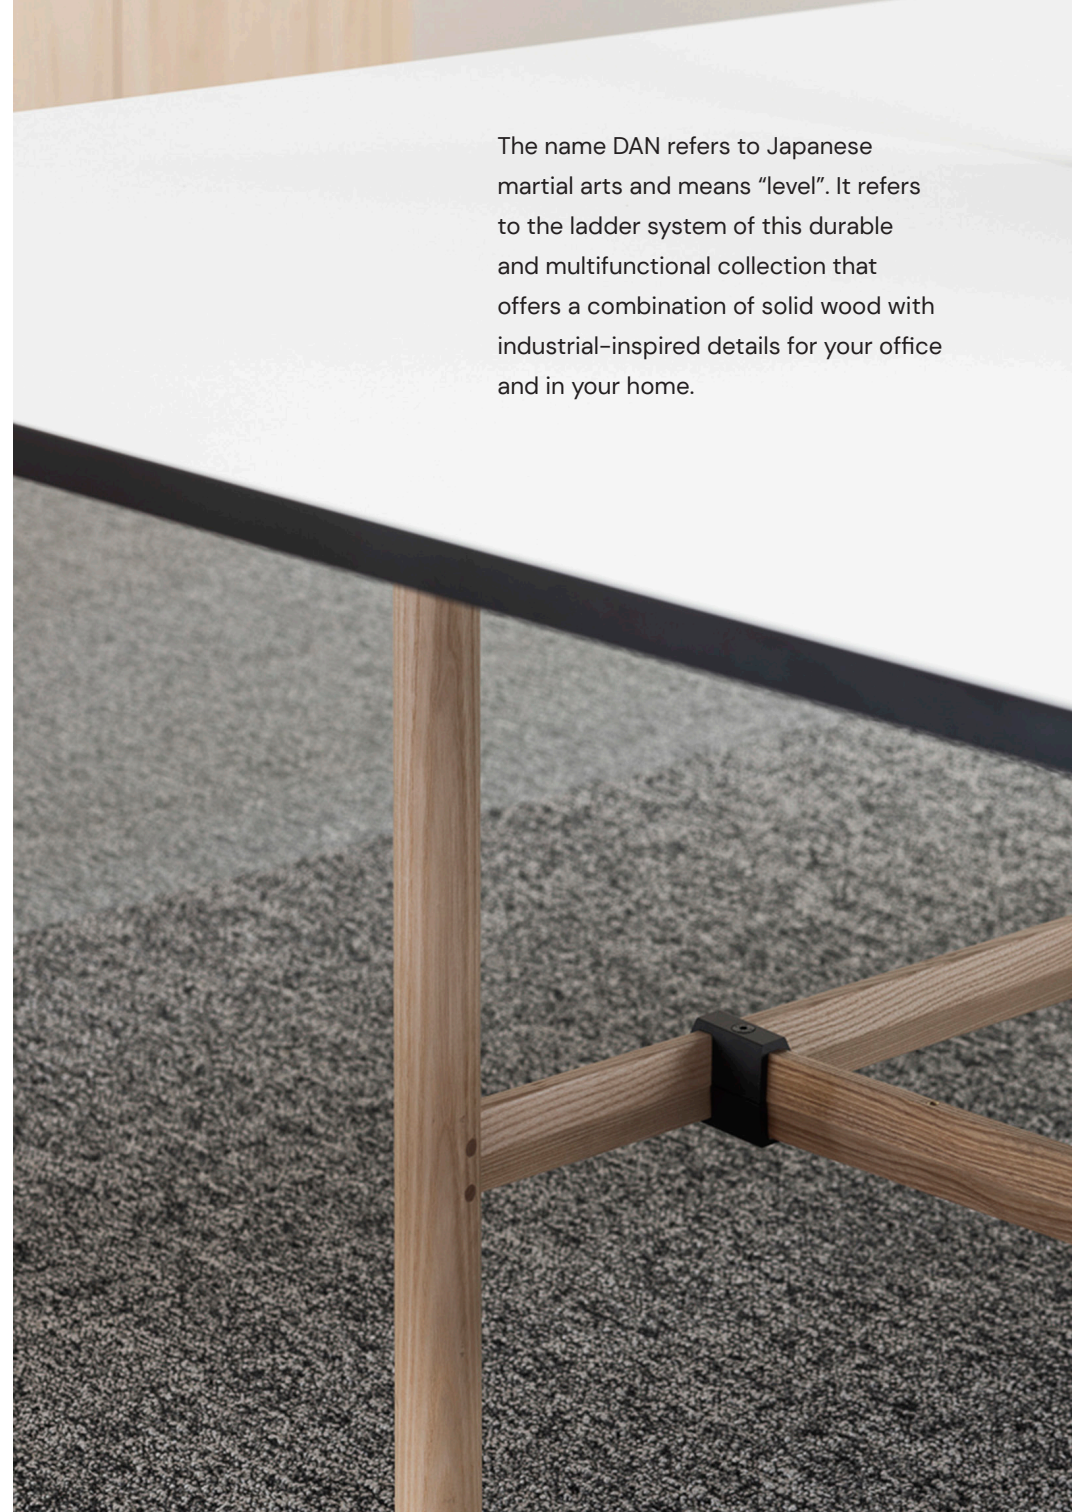

The name DAN refers to Japanese martial arts and means "level". It refers to the ladder system of this durable and multifunctional collection that offers a combination of solid wood with industrial-inspired details for your office and in your home.

# Senses

by Nathalie Van Reeth

Senses resulted from a perfect storm of the interesting collaboration between designer, manufacturer, client and technology. Van Reeth's approach to create a more organic and humanistic environment to work in resulted in a perfect harmony of soft shapes, rich materials and cutting edge technology.

# Lucca & Monica

by Gensler

Monica is quintessential Bulo. Both timeless and contemporary, she feels at home in different interiors. The lounge combines elements of classical woodworking and upholstery with state-of-the-art production techniques.

This chair goes well with Lucca, a small yet convenient side table. The intuitive wooden handle allows the user to adjust the table's height or to carry the table.

# Pub & Club

by Luc Vincent

With soft cushions and broad armrests, Pub & Club transcends the functional aspect of the desk chair to luxurious comfort and playful aesthetics. Pub & Club is the perfect antidote to the rigid technical office chair, making working cosy and warm with a touch of lounge.

**SL**

by Léon Stynen

The SL58 chair was designed in 1958 by Léon Stynen for the World Expo in Brussels. In 2016 Bulo reissued the chair in close collaboration with the Stynen family while staying true to the original design. SLL18 is the stackable polypropylene version of the original design.

# Tab Mesh

by Alain Berteau

Tab Chair is a humanistic response to the various ways we sit on a chair. The minimal use of material due to the shrink technology used on the rich fabric makes the chair a lightweight, ecofriendly and ergonomic product.
