

Monica Dubbel

in collab with Gensler

Courtesy Gensler Miami

GENSLER

Gensler is a global architecture, design and planning firm with 50 locations and more than 6000 professionals networking across the world. Founded in 1965, the firm serves more than 3500 active clients in virtually every industry. Gensler's product development team has selectively worked with manufacturers to design hundreds of successful products. From project brief to prototyping to finalizing the design, we continuously observed their informed criteria and process. Monica meets Gensler's high standard for form, function, quality and sustainable materiality. In 2019 Bulo and Gensler collaborated to design this lounge collection. Since it's first year of production, Monica has become a global favorite design.

Monica

Monica is a lounge chair with a unique duality: its' tailored form and solid wooden base provide a well-organized structure, while a softly draped upholstered soft shell rests like a blanket over the form. The identity of the chair is based on contrasts between hard and soft, static and fluid. Monica is a contemporary design with vintage references; adapted to the technicality, scale and comfort of today. Monica is an excellent specification for workplace, hospitality and residential projects.

Monica Dubbel

Monica Dubbel is the natural next-gen development of this best-selling lounge collection. Making space for two - simply makes sense. The lovely sculptural form provides a multitude of conversational and collaborative arrangements. Paired with Senses and Lucca side tables, Monica and Monica Dubbel create expansive opportunities to design inviting, sculptural, truly comfortable seating arrangements for collaboration, conversation, dining and more.

Monica Dubbel

The shell is made of a metal frame; molded in a HR High Density Flexible PU foam. Material: 52 - 66% Polyolblend & 48 - 34% Isocyanate MDI. The Comfort HR Cold cure foam contains no CFK's. Very high comfort standards are being met with this formula while the molded parts are "crushless" due to the composition of the isocyanate. The foam passes the California technical Bulletin 117 test; Test criteria: no open flaming smouldering ≤ 45 minutes, vertical char ≤ 38 mm

The armrests are made from FSC certified solid wood; treated with water-based lacquers that meet the most strict european norms. The legs are made from steel, certified, ISO 9001:2015, 14001:2015

CAL TB 117:2013

Leather is a natural material with natural variation in color and surface structure. No two are alike. A variety of markings like healed scars and abrasions may be visible and are not considered defects but are characteristics of genuine leather. On inquiry and at a surcharge, other leather colors than our standard colors may be available.
